

# WATERMART FLECK 7000 SXT WATER SOFTENING SYSTEM

## PURITY, SAFETY, PEACE OF MIND

Since 1991, WaterMart® has been a trusted source of water expertise for homes and businesses. We offer objective, knowledgeable advice, the highest quality products, reasonable prices and an efficient & professional service team.

## A GREAT TRACK RECORD

Fleck started with a simple idea in the mid '50s and now controls one-quarter of the residential water softener valve market. They are even more prevalent in commercial applications. Fleck valves were on the market by the 1960s and have led the way in softener innovations ever since.

Tests have shown that they can last 10,000 regeneration cycles. In actual use, this works out to over 25 years of water softening. Many experts (not just us) recommend water softeners with Fleck valves, saying other brands can require maintenance early on while a Fleck valve can go years without any trouble.

The five-year warranty offered is great, but chances are good that the warranty will run out before the part does. A contest held by the company resulted in the discovery of a 38-year-old valve still in working condition.

## FAMOUS PLACES THAT CHOOSE FLECK

The company boasts installations at various Starbucks locations and Disney's California Adventure in the United States and at Buckingham Palace and Heathrow Airport in England.

## WATER QUALITY ASSOCIATION CERTIFICATION

The WQA's Gold Seal goes to systems, components or additives that meet or surpass industry standards for contaminant reduction, structural integrity and material safety. Fleck components, as part of several softeners from Pentair Water Treatment (Fleck's parent company), have made the grade.
