

WaterMart® water filtration system

3, 4 or 5 stages

purity, safety and peace of mind

Since 1991... WaterMart® has been a trusted source of water expertise for homes and businesses. We offer objective, knowledgeable advice, the highest quality products, reasonable prices, plus an efficient and professional service team.

Healthy water without removing minerals!

Built specifically for those who want very clean water – but who don't want to use reverse osmosis.

BPA free.

A healthy choice - The standard **3 Stage** Filtration System will reduce the vast majority of impurities in our tap water – chlorine, lead, mercury, aluminium, asbestos, pesticides, herbicides, pharmaceuticals, hormones, chloramines, trihalomethanes – the list goes on.

Lead free – The lead free designer faucet comes in a variety of finishes to match your kitchen taps.

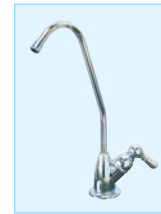

Endless years of service – the highest quality, highest capacity standard sized filter cartridges are included.

Achieve even greater purity by adding extra filters for fluoride and bacteria.

All components are NSF Certified.

Installed by highly experienced professionals:

- Our installers are Certified by the Water Quality Association.
- We can usually install within a few days of placing the order.
- We show up on time and do the job quickly and cleanly.
- Over 90% of our business comes from happy client referrals.

Match your décor with one of our standard or upgrade designer faucets in mirror chrome or brushed nickel. More options are available.

WaterMart® standard 3 stage filtration system. More stages can be added (see reverse).

WaterMart® water filtration system

3, 4 or 5 stages

purity, safety and peace of mind

Some healthy options...

Optional Stage 4:

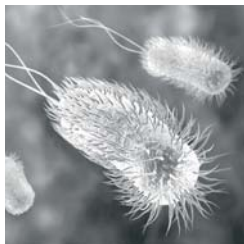

A fluoride filter: Fluoride is a very controversial chemical that is added to tap water. Many of our clients who are natural health professionals advocate removing fluoride from drinking water. We had a private laboratory test our fluoride filter on Toronto City Water (which contains

approx. 0.8 mg/L of fluoride). Our fluoride filter reduced this below detectable limits.

Optional Stage 5:

An ultraviolet light gives added peace of mind. A WaterMart® ultraviolet light will protect your family from any threat of bacteria in drinking water.

Stainless filter housings:

Some people just feel more comfortable using stainless steel. If you like, we offer the system in stainless filter housings.

Unlike reverse osmosis systems, this system will not remove minerals from your drinking water!

Minerals found by National Testing Laboratories in GTA Water	Result Value in mg/L in GTA water	Amount found by National Testing Laboratories in WaterMart® 3 stage filtration system
Calcium	40.1	36.8
Magnesium	9.4	9.2
Alkalinity	96	96

This system has been thoroughly tested on water from the **GTA...** we ensure the cleanest water!

Contaminant found by National Testing Laboratories in GTA Water	Result Value in mg/L in GTA water	Amount found by National Testing Laboratories in WaterMart® 3 stage filtration system
Aluminum	0.2	not detected
Chloramine	0.2	not detected
Chlorine (total)	0.2	not detected
Bromodichloromethane	0.006	not detected
Chloroform	0.006	not detected
Total Trihalomethanes	0.006	not detected
Dichloroacetic Acid	0.003	not detected
Monochloroacetic Acid	0.005	not detected
Trichloroacetic Acid	0.002	not detected
Total Halogenic acetic acids	0.010	not detected

Testing done September 13, 2010 by National Testing Laboratories in Cleveland, Ohio.

Install a shower filter:

It is often said that we absorb more chlorine through our skin and lungs while showering than we do from drinking. A shower filter will effectively remove this chlorine and give you a more healthy shower.
