

WATERMART® WATER SOFTENING SYSTEMS

Reliable, Efficient and Effective
– for less money.

You'll be amazed at the difference Watermart soft water makes!

- Your soap and shampoo will lather better.
- Your hair and skin will feel noticeably cleaner, softer, and not as dry. Hands will feel softer and look better.
- No soap scum or mineral deposits to clean off sinks, showers, tubs and toilets.
- Clothes will be softer, cleaner, whiter and brighter. Plus they will last longer. (Using soft water and increases the life of clothing, towels and linens up to 33%).
- Dishes will clean up more easily, and be spot free, without the gray film glasses get when etched by mineral-laden water.
- Water-using appliances will last longer and run better. Why? Because hot water heaters, washing machines and dishwashers used with hard water can wear out 30% faster.

We usually recommend Pentair's Fleck Water Softeners (they are the oldest company in the business and have a history of reliable performance). That said, we carry several makes and models of water softeners. They all have the following in common:

- High efficiency – all use a minimum amount of water and salt.
- No pre-filter required (no delicate meter, no filters to change and no annoying pressure drop).
- Available with chlorine filtration
- Smart! They clean themselves only when required.
- Use less power than an alarm clock.
- Lifetime battery backup.
- Comprehensive warranty.
- Include an easy to operate bypass valve.
- Made in the USA. Solidly built.
- 2 component design keeps salt out of the electronics and allows for good use of space.

No salt "Water Softeners":

- Over the past couple of years, many companies have been advertising "No-salt water softening systems". This is, in fact, very misleading. We sell units like this too – but almost entirely for the commercial market where the water is in closed loops and not exposed to air. We thought it needs to be clear what these systems offer. These units can be more accurately called; "scale prevention units" – not softeners. These salt-free scale prevention systems will not do the following:
 - Reduce mineral build up on dry surfaces such as glass from the dishwasher and shower doors.
 - Make water easier on skin and hair.
 - Reduce the amount of soap used in washing machines, dish-washers and the shower.
 - What these systems will do is prevent scale buildup inside hot water tanks and household plumbing.

CERTIFIED WATER EXPERTS
SINCE 1991

WaterMart®
Clearly the best

WE ARE THE MOST TRUSTED WATER TREATMENT COMPANY IN ONTARIO.

Here's how we do it:

- Honesty:** We won't sell you stuff you don't need. No upselling
- Adaptability:** We keep up with evolving technologies and best business practices.
- Expertise:** We have the knowledge, experience and skills required to do a thorough job every time
- Courtesy:** We respect and treat each customer as if they are family
